

GuruCE and Lauterbach announce their official partnership

Hoehenkirchen-Siegersbrunn, Germany, and Ohiwa, New Zealand, June 2015 – Lauterbach, leading manufacturer of microprocessor development tools, and GuruCE, well-known manufacturer of high quality Microsoft Windows Embedded Compact BSPs, announced a deepening of their relationship in the form of an official partnership between GuruCE and Lauterbach. The experts at GuruCE and Lauterbach already have a long working relationship that is now brought to an even higher level of cooperation.

Lauterbach's debugging expertise combined with GuruCE's Windows Embedded expertise has been critical in creating a highly reliable and extremely well performing iMX6 BSP for Windows Embedded Compact 7 and 2013.

GuruCE now ships easy-to-use Lauterbach JTAG scripts with their iMX6 BSP so that GuruCE's customers can, if needed, dive deep with the help of the best JTAG solutions for Windows Embedded Compact by Lauterbach.

“We at Lauterbach very much enjoy the cooperation with GuruCE. Close contacts between the developers and managers of both companies ensure a fast time-to-market of new solutions, as well as a rapid response to customer support issues”, said Rudi Dienstbeck at Lauterbach.

“The expertise of Lauterbach has been invaluable in tracking down some very complex issues with L1 and L2 cache coherency in the multi-core iMX6 processors. Without the excellent support & tools of Lauterbach it would have taken us much longer to create a fully multi-core cache-coherent BSP for the iMX6”, said Michel Verhagen at GuruCE.

About GuruCE

GuruCE offers deep technical knowledge of Windows Embedded Operating Systems. The consultants of GuruCE are among the best in Windows Embedded BSP & driver development, training and consulting. They help customers overcome the steep learning curve and greatly reduce the time-to-market for their products. GuruCE operates as an umbrella for the top 5% of talented Windows Embedded consultants. Most of the experts working with us are Microsoft MVPs. GuruCE employs local experts in Europe (Netherlands), USA and New Zealand. For more information please visit <https://guruce.com>

About LAUTERBACH

Lauterbach is the leading manufacturer of complete, modular and upgradeable microprocessor development tools worldwide with experience in the field of embedded designs since 1979. It is an international, well-established company with blue chip customers in every corner of the globe and has a close working relationship with all semiconductor manufacturers. At the headquarters in Höhenkirchen, near Munich, the engineering team develops and produces highly proficient and specialized Development Tools, which are utilized all over the world under the brand TRACE32®. Own branch offices exist in United Kingdom, Italy, France, Tunisia, on the East and West coasts of the United States, Japan and China. Highly qualified sales and support engineers are also available in many other countries. For more information visit <http://www.lauterbach.com/>
